

WHITNEY ARCHITECTS, CHICAGO IL.

Our client, Whitney Architects Inc, needed new beautiful new space for their diverse team of designers and architects. This hardworking team spends their days working to “transform spaces into vibrant environments that inspire people and propel growth for businesses.” And so do we. It was a good match. Whitney needed a conference room and a number of collaborative spaces for people to work. And they needed it fast. Falk delivered with a 10-week construction schedule.

“We are over the moon happy.”

Mark Stenftenagel, Whitney Architects Inc.

THE DEETS

The project includes gorgeous glass walls and doors with standard slow down mechanisms. Plumbing, electrical and technology are all accommodated in the solid walls and easily accessible when needs change. The Falkbuilt install virtually eliminated waste on the job site.
